

# Group Meeting Notes

- Code of conduct is sufficiently good.
- Received good feedback on the context diagram.
- we need different databases for each component

## **Feedback on the requirements:**

- Explain capabilities a bit more ( include more details about the positions in the must-list ; fourth MUST in the list)
- Move the first COULD to the SHOULD list
- Second COULD should be a MUST
- Third COULD should be SHOULD
- Find more COULDS (maybe some that are not in the scenario)
- Notification Microservice as the first COULD.
- We can update the requirements list during the coding process
- This week everyone MUST start coding.

## **Feedback on the UML Diagram Draft:**

- check design patterns
