Sprint Retrospective, Iteration #1

Issue #	Tasks #	Tasks Assigned To	Estimated Effort per Task (in hours)	Actual Effort per Task (in hours)	Done (yes / no)	Notes
#1	Add scheduler microservice and functionality for matching	Elena Dumitrescu, Robert Vădăstreanu	15h	15h	yes	Completed in pair-programming style
#2	Add event microservice with basic functionality	Sander Vermeulen, Xingyu Han	10h	11h	yes	Completed in pair-programming style
#3	Add basic package structure for user microservice	Alexandra Darie, Zoya Van Meel	10h	12h	yes	Completed in pair-programming style

Project: Rowing

Group : 31b

Main Problems Encountered

Problem 1

Description: We had different understandings of the full architecture and so our code was not entirely cohesive.

Reaction: We had a meeting debating on how the architecture would be most efficient and then applied the canges to our code.

Adjustments for the next Sprint Plan

We will get more into details when talking about what our next branches should implement and how our microservices will communicate with each other.
